For snug and cosy contentment

CHRIST lambskins give you a feeling of snug and cosy contentment and create a peaceful, blissfully warm atmosphere.

CHRIST lambskins convey a sublime sense of comfort and an ambience of inviting homeliness.

Feel the wonderfully delicate and soft wool fibres gently stimulating your skin and blissfully relaxing you. Let the innumerable, fine wool fibres gently touch and caress you.

Bed overlays made of medical lambskin to ensure a restful sleep

Having a restful sleep promotes good health. The fine wool fibres of lambskin bed overlays are ever so gentle on your skin and ensure restful relaxation. You can rest or sleep on the lambskin itself without any sheet. It can then fully unfold its pleasant qualities.

CHRIST bed overlays come with a shorn depth of pile or with unshorn, natural first year's wool. The advantage of shorn lambskins is that the levelled surface provides better support. The individual fibres cannot twist together with each other. Lambskins with unshorn, natural first year's wool have never been shorn. The wool fibres are approximately 50-60mm long and feel extremely soft and fleecy because the ends of the fibres are still rounded like in their virgin state. Only very few lambskins can meet the rigorous criteria needed for such overlays.

1_Bed overlay COMFORT made of shorn lambskins with a depth of pile of 30mm.

Article 1100; standard sizes: 70x140cm, 80x160cm, 90x190cm, 90x200cm, 100x200cm

11_Lambskin kidney warmer

The cotton fabric quilted with padding is completely lined with lambskin on the inside. The depth of pile is approx. 15mm so that the kidney warmer is not too bulky. A Velcro fastening provides variable adjustment for the most comfortable fit.

Article 1510;

Size S for waist size 80-95cm

Size M for waist size 90-110cm

Size L for waist size 110-130cm

12_Lambskin elbow protectors, 1 pair

Article 1302; universal size, length 30cm, width 34cm

13_Lambskin knee warmers, 1 pair

Article 1304; universal size, length 31cm, width 44cm

14_Heel protectors, 1 pair

These protectors have been developed especially for people at risk of bedsores. It is particularly at the heels with their convex shape and the pressure that can then build up on them that the risk is relatively high. Heel protectors made of genuine lambskin can provide real relief in such situations.

Article 1300; universal size, leg height 17cm, foot length 16cm

With the protectors worn right next to the skin you will feel the gentle stimulation of the fine wool fibres and the pleasant, soothing warmth of the lambskin with a shorn depth of pile of approx. 30mm.

The two Velcro fasteners make it ever so easy to put on the elbow protectors, knee warmers and heel protectors and to adjust them for a perfect fit.

Warmth is one of our basic needs. Lambskins provide us with this warmth through the perfectly natural process of creating a cushion of air in the thick wool and by countless wool fibres gently stimulating us.

Thermotherapy is one of the oldest medical techniques used in the wide variety of medical systems and is found not only in conventional western medicine but also in naturopathy and Chinese medicine.

There are a host of different ways in which medical professionals use the beneficial effects of warmth. These include to relax muscles, improve blood circulation, reduce the viscosity of synovial fluid, improve the elasticity of collagenous connective tissue and to relieve pain.

Wheelchair accessories and thermotherapy

15_ Wheelchair cosies are cut in a comfortable body shape so that creases won't form in the knee area and they are long enough when you are sitting. The two-way zip makes it easy to get into the cosy and fasten it up. The easy-care outer fabric is breathable and washable but it is not completely waterproof.

Article 1410 – LUXUS; lined inside with genuine lambskin

Article 1400 – KOMFORT; lined inside with virgin wool fur fabric

Virgin wool fur fabric is a woven fleece consisting of 60% pure new wool and 40% polyester.

Colours: 54 – marine blue/anthracite and 24 – sand beige/anthracite
 Junior size; seat width 40cm, seat depth 43cm, back height 37cm, circumference 138cm, Senior size; seat width 43cm, seat depth 46cm, back height 40cm, circumference 147cm

Immobile people have a very great need for a pleasant feeling of warmth and security. Our lambskin products provide this blissful warmth through the insulating cushion of air which is created in the wool and through the stimulation of the countless, fine wool fibres. Warmth produced perfectly naturally.

16_ Wheelchair covers made of genuine lambskin are pleasantly soft and warm. They are fitted on the pushing handles with elastic loops and fastened with straps going under the seat. The shorn depth of pile is approx. 30mm to ensure the lambskin provides good support.

Article 1200; colours: 02 – natural, 04 – anthracite; sizes: 35x85cm, 40x85cm, 45x85cm

Fashionable lambskins and more

Lambskin is a natural product. The special processes we employ produce superbly crafted, wonderfully soft and smooth lambskins – manufactured using environmentally compatible methods and tested for harmful substances. And each and every lambskin is unique with its very own special character. We are happy to surround ourselves with this special creation of nature. It fits into every environment and produces a sense of well-being and contentment – perfectly naturally.

17_Double skin/rug-cum-bench cover DELUXE

made of lambskins with unshorn, natural first year's wool.

Article 2025; length approx. 170cm, width in animal shape approx. 45–60cm

Double skin/rug-cum-bench cover COMFORT

made of shorn lambskins with a depth of pile of 30mm.

Article 2005; length approx. 170cm, width in animal shape approx. 45–60cm

The advantage of shorn lambskins is that the levelled surface provides better support. The individual fibres are firmer and cannot twist together with each other. Lambskins with unshorn, natural first year's wool have never been shorn. The wool fibres are approximately 50–60mm long and feel fleecy because the ends of the fibres are still rounded like in their virgin state. Only very few lambskins can meet the rigorous criteria needed for this.

18_Lambskin muff for snug and warm hands. Made of brown lambskins shorn to a depth of pile of 30mm. The cylinder is made of loden and contains a zip pocket for your smartphone or purse. The length of the carrying and shoulder strap can be adjusted.

Article 1312; length 35cm;
colours: 37 – loden green/brown, 77 – loden brown/brown

sizes: 36-44, availability on application

Article 5812 men's waistcoat "Hugo",
colour 666 – black, 999 – dark brown,
Sizes: 48-56, availability on application

Care instructions

for detergent C7

Lambskins from the specialist. Experience since 1954

We are the specialists for lambskins. Only selected skins are used for our articles. They are tanned in our own tannery in compliance with the highest quality criteria. In the past years our tannery has been awarded several times by environmental organizations for its exemplary facilities and excellent working conditions.

Only selected skins which are tested for their suitability are being used. The wool is stain resistant by nature and of easy care. Lambskins possesses natural self-cleaning properties. Regularly air all lambskin articles to neutralise odours and help wool stay fresh.

Washing and care instructions:

Due to our special tanning, you can wash all Sanofell products in the washing machine and tumble-dry them. Use our own „C7“ detergent only. Set your washing machine to the wool cycle at 90 °F or 30°C. You may add fabric softener during the last rinse. The skin can be spun and then dried in the tumble-dryer using the delicate fabrics programme. The leather side often stays damp which then can be dried at the fresh air. If you do not have a dryer, lay the skin out to dry with the wool side facing upwards. Avoid direct sunshine or direct heat sources. Pull the skin back into shape a number of times during the drying process.

Special lambskin detergent C7

To wash our lambskin products a special detergent is necessary.

By using our C7 for lambskins you obtain the best washing result.
